

Christmas Wishlist

1. Solving climate crisis like deforestation
2. End world hunger and poverty
3. Free global distribution of vaccines
4. End global conflicts and have world peace
5. Eradication of diseases
6. Free education for all
7. Ending prejudice and discrimination- equal rights
8. Moderating weapons of mass destruction
9. Breakthrough in spacecraft technology
10. Treating others how you'd like to be treated

We chose the issues that relate to protecting our Earth first because we thought it was important to take care of our planet before we take care of the people on it otherwise we wouldn't have a planet to protect and live on. We decided that the next few should be about prolonging people's lives and making them better like giving people a free education and equal rights. Afterwards, defending the other creatures that share this planet with us seemed important because our ecosystem is fundamental to our planet's survival. The final few choices are to stop poverty, conflicts, etc from starting again. Breakthroughs in spacecraft tech was important to us because it means we can learn more about our galaxy and others similar to this one. Last is to treat people like human beings as it is social etiquette and unite with each other.

Thanks to our school PHSE lesson we were able to do this and learn more about our world so we can save it for the future.
